

CALCULATING PACK PD HOURS

Each PRO Pack is worth between 1-4 professional development hours.

PD HOURS ARE CALCULATED BASED ON A COMBINATION OF FOUR FACTORS:

- 1 The time it takes the educator to review the video footage.
- 2 The time it takes the educator to review the downloadable resources.
- 3 The time it takes the educator to review the extra related material, such as magazine articles and/or podcasts.
- 4 The time it takes the educator to incorporate their new learning into their teaching practice.

The most important part of any professional development experience is when the educator thinks deeply about how to incorporate their new learning into their teaching practice. This is why reviewing video footage is just one part of earning PD hours. It is expected that educators will also spend time reviewing the supplemental materials and planning how to bring their new knowledge to their classroom and curriculum.

In addition to completing the quiz at the end of the Pack, some administrators ask that teachers provide a written reflection or other summative assessment.
